

Our Ethos and Mission

Our school supports pupils who have not been able to succeed in education elsewhere due to the complexity of their needs. We believe that children are not able to learn well and make academic progress until their emotional and behavioural needs are recognised and supported, so that they feel confident and secure.

Therefore, we teach life skills and coping strategies alongside academic subjects and outdoor learning. Our pupils are taught to contribute to the school and wider communities so that they gain self-esteem and understand how they can make a positive difference to the world.

Our aim is to help our pupils experience success, face new challenges and use effective strategies to manage difficult situations. We seek for them to leave the school with the skills they need to progress further in their education or training.

We help pupils become:

- Healthy
- Safe
- Successful
- Sociable
- Independent
- Resilient
- Confident
- Creative
- Risk aware
- Problem Solving
